

# THE SHORTEST WAY TO DEFINE YOUR SUPPORT

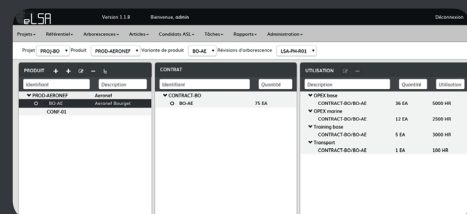

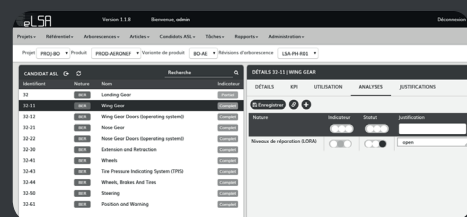

**WITH MORE THAN 25 YEARS' EXPERTISE IN INTEGRATED LOGISTIC SUPPORT,**

LGM UTILIZED ITS SKILLS AND KNOWLEDGE TO BUILD THE FIRST TOOL **MADE BY AND FOR THE LSA EXPERTS.**

## OUR OFFER

- Define easily a support concept for all systems' configurations.
- Build a support system following a clear LSA process and manage the progression.
- Ensure the traceability of changes throughout the life cycle and measure the performance of the support system through reports.
- Produce deliverables by exporting data according to ASD S3000L specification and PLCS standard.

SOLUTION DEPLOYED FOR:

## PRODUCTIVITY

With **eLSA**, producing the logistic breakdown, defining the relevant analysis and deducing the maintenance plan adapted to each one of your customers has never been so **simple** and **fast**. Concerning the project management, the integrated validation functions guarantee the quality and adequacy of the data produced.

## ERGONOMIC

The application is a **web client**.

The intuitive interface designed from the very first by LSA experts with an objective of simplicity of use.

## INTEROPERABILITY

eLSA is the first LSA solution on the market based on ASD specifications, more specifically the **S3000L** and **PLCS** standard to enable the data exchange between the various support functions (documentation, supply, training...), making eLSA the best tool **to define a complete support system**.

## ALTERNATIVES

Advanced management of diversified products through variants, configurations and applicabilities enable the **operational context management** of the product according to each customer, with a perfect control of the impacts on the support system.

## TRACEABILITY

As an analytical tool, eLSA **traces and logs** each justification that has led to an **evolution of the support system**. Each state of the LSAB can be compared to the previous state and the impacts are controlled throughout the life time of the product.

## REPORTING

eLSA basic version not only comes with a set of professional reports ensuring **data consistency** but also to provide **decision making support** for the overall performance of the support.
